1. About VoltKart and This Knowledge Base

1.1 Who we are

VoltKart is an online retailer of consumer electronics and accessories in India. We sell smartphones, laptops, tablets, audio devices, wearables, smart-home products, cameras, power banks, chargers, cables and everyday computer accessories. Products are sold either directly by VoltKart or by VoltKart-approved partner sellers. Every product page states clearly who the seller is, what warranty applies and whether the product is returnable.

1.2 Purpose of this document

This knowledge base is the reference used by the VoltKart support team and by the VoltKart virtual support assistant to answer customer questions. It describes how orders, payments, delivery, returns, refunds, warranty, accounts and technical issues are handled. Policies in this document apply to orders placed on the VoltKart website and the VoltKart mobile app within India.

1.3 What the virtual assistant can and cannot do

The virtual assistant answers general questions using the policies in this document. It is meant to explain how things work and to point customers to the right place in their account.

- The assistant can explain policies, timelines, eligibility rules and step-by-step procedures.
- The assistant cannot see live order status, courier location, payment status or account details.
- The assistant cannot approve, reject or issue refunds, replacements or compensation.
- The assistant cannot change, cancel or create orders.
- The assistant never asks for passwords, one-time passwords (OTPs), verification codes, full card numbers or card security codes.
- If a question is not covered in this document, the assistant should say so and direct the customer to the Help section instead of guessing.

1.4 Support channels and hours

Customers can reach the support team through the Help section of the VoltKart website or mobile app. Chat and ticket support are available from 9 AM to 9 PM IST, every day of the week including public holidays. Tickets raised outside these hours are answered the next morning. Phone support is not offered; all requests are handled through chat and tickets so that a written record is available for both sides.

1.5 Typical response times

- Chat: connected to an agent within a few minutes during support hours.
- Standard tickets: first response within 24 hours.
- Payment and refund tickets: first response within 24 hours; resolution depends on the bank or payment partner.
- Courier trace requests: the courier partner normally replies within 2 to 3 business days.
- Escalated complaints: reviewed within 3 business days.

1.6 What to keep ready before contacting support

Having the following details ready helps the team resolve the issue faster.

- Order reference, shown in My Orders and in the confirmation email.
- Registered email address or mobile number (never the password).
- Transaction date, amount and payment method for payment issues (never the full card number).
- Clear photos or a short video for damaged, defective or wrong items.
- The exact error message and the steps that led to it for technical problems.

1.7 Topics outside the scope of support

VoltKart support helps only with VoltKart orders, products, accounts and payments. We do not offer or advise on financial products such as insurance, loans or investments. We cannot help with orders placed on other websites, with products bought from third-party shops, or with repairs on products that were not purchased from VoltKart. General knowledge questions, medical or legal questions and requests unrelated to shopping at VoltKart are outside the scope of this support service.

2. Account Registration and Login

2.1 Creating an account

A VoltKart account is free. To register, open the website or app, choose Sign Up and enter your name, email address and a mobile number. A one-time verification code is sent to confirm each contact. You then create a password of at least 8 characters containing letters and numbers. You can also continue with a supported social login, in which case no separate VoltKart password is created.

2.2 Who can register

Account holders must be 18 years or older. A parent or guardian may place orders on behalf of a minor from their own account. Each mobile number and email address can be linked to only one account.

2.3 Logging in

Log in with your registered email address or mobile number. If you use a mobile number, a one-time password is sent by SMS. If you use email, enter your password. VoltKart staff will never call, message or email you asking for your password or OTP.

2.4 Forgot password

If you cannot log in, select Forgot Password on the login page. Enter your registered email address or mobile number. A reset link is sent by email, or an OTP is sent by SMS if you used a mobile number.

- Reset links are valid for 30 minutes and can be used only once.

- If the email does not arrive within a few minutes, check the spam or promotions folder.
- Confirm that you typed the email address or number you registered with; a different address will not receive the link.
- Request a new link if the first one has expired.

2.5 Account locked after wrong attempts

After 5 incorrect password attempts the account is locked for 30 minutes as a security measure. During this time you cannot log in even with the correct password. Wait for 30 minutes and try again, or reset your password using Forgot Password. Repeated lock-outs from unfamiliar locations may trigger an additional identity check.

2.6 I no longer have access to my registered email or number

If you can no longer access the registered email address or mobile number, contact support through the Help section from any device. The support team will guide you through a verification process, which may involve confirming recent order details. For your safety the team can never share or change account details without successful verification, and it will never ask for your password.

2.7 Updating your profile

Go to Account and then Profile to change your name, email, mobile number, date of birth or saved addresses. A one-time verification code is sent to confirm a new email address or mobile number before the change takes effect. Name changes do not alter invoices that were already generated.

2.8 Managing saved addresses

You can save up to 10 delivery addresses in Account and then Addresses. A saved address can be edited or deleted at any time, but changes do not apply to orders that have already been dispatched. Make sure the pin code, house or flat number and a working mobile number are correct, because couriers use these to complete delivery.

2.9 Deleting your account

Open Account, then Privacy, and select Delete Account. Pending orders, open returns and unresolved refunds must be completed first. Deletion is permanent: your saved addresses, order history, wishlist and reward balance are removed and cannot be restored. Invoices required by law may be retained for the legally required period even after deletion.

3. Account Security and Privacy

3.1 Protecting your account

Use a strong password that you do not use on other websites. Never share your password, OTP or verification code with anyone, including people who claim to be from VoltKart, a bank or a courier company. VoltKart will never ask for these in a call, SMS, email, social media message or chat.

3.2 Recognising suspicious messages

Be careful if a message:

- asks for your password, OTP, card number, card security code or UPI PIN;
- asks you to install a remote-access or screen-sharing app;
- contains a link that does not start with the official VoltKart website address;
- offers a refund, prize or cashback that you did not request;
- creates urgency, for example by saying your account will be blocked in an hour.

Do not click links or reply. Report the message through the Help section so that our security team can act on it.

3.3 What to do if you suspect unauthorised access

If you notice orders you did not place or receive a password-change email you did not request, reset your password immediately using Forgot Password and log out of all devices from Account and then Security. Then contact support with the details. If a payment was made without your knowledge, also inform your bank or payment provider quickly so that the card or UPI handle can be blocked.

3.4 How we handle payment information

Payments are processed through secure, certified payment partners. VoltKart does not store your full card number or card security code. For faster checkout you may choose to save a card; in that case only a secure token and the last four digits are kept, and you must still enter the security code for each payment.

3.5 How we use personal data

Personal data such as your name, contact details, addresses and order history is used to process orders, arrange delivery, provide support, prevent fraud and improve our service. Data may be shared with courier partners, payment partners and authorised service centres only as far as needed to fulfil your order. VoltKart does not sell personal data. Marketing messages can be switched off at any time in Account and then Notifications; service messages such as order updates cannot be switched off.

3.6 Data requests

You can request a copy of the personal data linked to your account or ask for corrections through the Help section. Requests are verified for security and are normally completed within 15 business days.

4. Placing an Order

4.1 How to place an order

Search for or browse a product, check its page, then choose Add to Cart or Buy Now. At checkout, select or add a delivery address, choose a delivery option, apply any coupon or gift card, pick a payment method and confirm. An order confirmation is shown on screen and sent by email and SMS.

4.2 Reading the product page

Before ordering, check the seller name, price, offers, delivery estimate for your pin code, warranty period, return eligibility and the box contents. Products marked Non-returnable cannot be returned except when defective, damaged or wrong. Specifications are supplied by brands, and minor differences in colour or packaging can occur.

4.3 Delivery pin code check

Enter your pin code on the product page to see whether delivery is available and the estimated delivery date. If a pin code is not serviceable, the product cannot be ordered to that address. Estimated dates are indicative and are not a guarantee.

4.4 Order confirmation

After successful payment or COD selection, the order appears in My Orders with a unique order reference. If you do not see the order and no confirmation email arrives, do not place the same order again immediately. Check My Orders and your payment app first; if money was deducted without an order, see the section on failed payments.

4.5 Price changes and stock

Prices and offers can change without notice until an order is confirmed. If a product becomes unavailable after the order is placed, for example because of a stock mismatch, the order is cancelled and any amount paid is refunded in full to the original payment method.

4.6 Quantity limits

To prevent bulk purchasing and resale, some products have a quantity limit per customer per order or per month. Orders that exceed the limit may be cancelled, and the amount is refunded.

4.7 Ordering for someone else

You can deliver an order to a different person by entering their name, address and mobile number at checkout. The courier may ask the recipient for an OTP or order details at the time of delivery. Gift packaging and a gift message can be added at checkout where the option is shown.

4.8 Pre-orders and upcoming launches

Some products can be pre-ordered before launch. The product page states the expected dispatch date. Pre-orders can be cancelled free of charge before dispatch. Dispatch dates may change if the brand reschedules the launch, and customers are notified by email and SMS of any change.

4.9 Invoices and GST details

The invoice is generated when the order is dispatched and can be downloaded from the order details page. To receive a GST invoice, enter your GSTIN at checkout before placing the order. A GSTIN cannot be added to an invoice after the order has been dispatched.

5. Payments and Billing

5.1 Accepted payment methods

VoltKart accepts the following payment methods:

- UPI, including payment through any UPI app;
- credit cards and debit cards from major networks;
- net banking from supported banks;
- digital wallets;
- EMI on eligible credit cards and selected debit cards;
- Cash on Delivery (COD) for eligible pin codes and orders up to Rs. 50,000;
- VoltKart gift cards and store credit.

The methods available at checkout depend on the order value, the products in the cart and the delivery pin code.

5.2 Payment status

The payment status of an order is shown on its order details page. Typical statuses are Payment pending, Payment received, Payment failed and Refund initiated. A payment shown as pending may take up to 30 minutes to update while the bank confirms the transaction.

5.3 Paying with UPI

Choose UPI at checkout and enter your UPI ID or select a UPI app. Approve the request in your UPI app within the time limit shown on screen. Do not press back or close the page while the payment is being confirmed. VoltKart never asks you to share your UPI PIN, and you should enter the PIN only inside your own UPI app.

5.4 Paying with cards

Enter the card number, expiry date and security code on the secure payment page, then complete the authentication step required by your bank, which is usually an OTP. VoltKart does not see or store the full card number or the security code. Never send card details to support through chat or email.

5.5 Cash on Delivery

COD is available only for eligible pin codes and for orders up to Rs. 50,000. Pay the delivery agent in cash or through the UPI QR code shown by the agent at the time of delivery. Orders that are repeatedly refused at the door may lose COD eligibility for future orders. COD is not available for some categories such as gift cards, pre-orders and very high-value items.

5.6 Payment failed but money was deducted

Sometimes a bank deducts the amount although the payment page shows a failure. In most cases the amount is returned automatically by your bank to the same account or card within 5 to 7 business days. Do not pay again for the same order repeatedly. If the amount is not returned after 7 business days, contact the billing team with the transaction date, the amount and the payment method, and attach a screenshot or bank statement line with the card number hidden.

5.7 Charged twice for the same order

If you think you have been charged twice, do not make another payment. Contact the billing team with the transaction date, the amount and your order reference. The team checks the payment

records. If a duplicate payment is confirmed, the extra amount is refunded to the original payment method, usually within 5 to 7 business days after confirmation.

5.8 Amount deducted but order not visible

If money has been deducted and the order does not appear in My Orders, wait for 30 minutes, since confirmations can be delayed. If the order is still missing, the payment is treated as a failed transaction and the amount is usually reversed automatically. If it is not reversed within 7 business days, contact the billing team.

5.9 Payment declined by the bank

A decline can be caused by an incorrect OTP, an expired card, insufficient balance, a daily transaction limit or international usage being switched off. Try another payment method or contact your bank. VoltKart cannot see the bank's reason for declining a transaction.

5.10 Getting an invoice

The invoice becomes available in the order details page once the order is dispatched and can be downloaded as a PDF. A separate invoice is generated for each seller when an order contains products from more than one seller.

5.11 Price difference after purchase

VoltKart does not offer price-match or refund of the difference if the price of a product drops after an order has been placed. Prices shown at the time of order confirmation apply.

5.12 Security of payments

Do not share your card number, security code, UPI PIN or OTP with anyone. If you receive a payment request that you did not initiate, decline it. If you believe your card or UPI handle has been misused, contact your bank immediately to block it.

6. EMI, Coupons, Offers and Gift Cards

6.1 EMI options

EMI lets you pay for a product in monthly instalments. Two types are offered:

- No-cost EMI, where the interest charged by the bank is adjusted as an instant discount, available on selected products and credit cards;
- Standard EMI, where the bank charges interest as per its own rate.

EMI is available only on orders above a minimum value shown at checkout, and the eligible banks and tenures depend on the product and the offer. The monthly amount, interest and any processing fee are displayed before you confirm the order.

6.2 EMI and returns

If an order paid with EMI is returned and refunded, the refund goes back to the card and the bank cancels or adjusts the EMI. Banks may charge a processing fee or interest already billed, and these charges are decided by the bank and not by VoltKart. Refunds on EMI orders can take

longer than normal card refunds because the bank must reverse the instalment plan.

6.3 Coupons and offers

Coupons and bank offers are subject to conditions. They may apply only to specific products, brands, payment methods or customers, may have a minimum order value, and usually cannot be combined with other coupons unless the offer says so. Each coupon has an expiry date and a usage limit.

6.4 Why my coupon did not work

Common reasons are:

- the coupon has expired or has reached its usage limit;
- the minimum order value has not been met;
- the product or category is excluded from the offer;
- the required payment method or card has not been selected;
- another offer has already been applied and the two cannot be combined.

Open the coupon terms in the cart to see the exact conditions.

6.5 Offers on returned orders

If an order that used a coupon is partially returned, the discount is split across items in proportion to their value. The refund for the returned item is the amount actually paid for it after the discount. If a return causes the remaining items to no longer meet the coupon conditions, the coupon benefit may be recalculated.

6.6 Gift cards

Gift cards can be purchased from the website and used at checkout by entering the gift card code in the payment step. Gift cards are valid for 12 months from the date of purchase, cannot be exchanged for cash, cannot be refunded, and cannot be used to buy other gift cards. Gift card codes should be treated like cash; VoltKart will never ask you to share a code to receive a refund or prize.

6.7 Store credit

Store credit may be issued as a goodwill gesture or for refunds to the VoltKart wallet when you choose that option. Store credit is shown in your account, is valid for 12 months from issue and can be used on any future order.

7. Order Tracking

7.1 How to track an order

Open My Orders in your VoltKart account and select the order. Once the order is dispatched, the page shows a tracking link, the courier name and the latest status. The same tracking link is sent to you by email and SMS. Tracking is not available until the order has been handed to the courier.

7.2 Order statuses explained

- Order placed: the order is confirmed and awaiting packing.
- Packed: the item is packed and ready for the courier.
- Dispatched: the courier has collected the parcel.
- Out for delivery: the parcel is with the delivery agent for delivery that day.
- Delivered: the parcel has been handed over to you or the recipient.
- Delivery attempt failed: the courier could not complete delivery and will try again.
- Cancelled: the order has been cancelled and any refund has been initiated.

7.3 Tracking has not updated

Courier scans can take some time, especially for long distances or remote areas. If the tracking page shows no movement for 48 hours, contact support through the Help section and quote your order reference. The team raises a trace request with the courier and updates you once the courier replies, usually within 2 to 3 business days.

7.4 Marked delivered but not received

If the status shows Delivered and you have not received the parcel, first check with family members, neighbours and the building security. If it is still missing, raise a request within 48 hours of the delivered status, with your order reference. The team investigates with the courier, which can include checking delivery proof. If the delivery cannot be confirmed, a replacement or a refund is arranged.

7.5 Live order status and the assistant

The virtual assistant cannot access live order or courier data and cannot confirm where an order is at a specific moment. The latest status is always available in My Orders and on the courier tracking link.

7.6 Tracking orders with several parcels

An order containing several products may be shipped in separate parcels from different warehouses or sellers. Each parcel has its own tracking link, and parcels may arrive on different days. This does not affect the total price.

8. Delivery and Shipping

8.1 Delivery coverage

VoltKart delivers only within India. We currently do not deliver to addresses outside India and cannot ship to international forwarding addresses. Delivery availability is checked using the pin code.

8.2 Delivery times

Standard delivery usually takes 3 to 6 business days after dispatch. Metro cities are often faster, while remote locations and some regions can take longer. The estimate shown at checkout is

indicative and not guaranteed. Delays can occur because of weather, public holidays, strikes, traffic restrictions or courier capacity.

8.3 Express delivery

Express delivery is offered for selected pin codes and selected products and is shown at checkout with its extra charge. Express orders are normally delivered within 1 to 2 business days of dispatch. The express charge is refunded if an express order is cancelled before dispatch or if the promised express delivery is missed by VoltKart.

8.4 Delivery charges

Orders above a minimum value qualify for free standard delivery. Below that value a delivery fee is shown at checkout before you pay. Large items such as televisions and some smart-home devices may have installation or special-handling charges, which are shown on the product page.

8.5 Delivery attempts

The courier makes up to 3 delivery attempts. A call or SMS is sent before each attempt. If all 3 attempts fail, the parcel is returned to the VoltKart warehouse and the order is cancelled, and the amount is refunded to the original payment method after the parcel is received back. Please keep your phone reachable and make sure the address and pin code are complete.

8.6 Delivery OTP

For high-value orders, the delivery agent may ask for an OTP sent to your registered mobile number. Share this OTP only with the agent at the door at the time of delivery and never over the phone.

8.7 Changing the delivery address

The address can be changed only before the order is dispatched, from the order details page. After dispatch, the address cannot be changed. If you have given a wrong address and the parcel is already on its way, you can refuse delivery or contact support quickly, but a change is not guaranteed.

8.8 Opening the parcel

Please check that the outer packaging is not tampered with or damaged before accepting the parcel. For high-value items, record a short unboxing video, from opening the package to checking the product. This helps us to resolve damage or missing-item claims quickly.

8.9 Installation and demo

Installation and demo are available for selected products such as televisions, air purifiers and large smart-home devices. A technician visit is scheduled within 48 hours of delivery. Installation is free where the product page says so; otherwise a fee applies. Customers must be present at the scheduled visit.

9. Order Changes and Cancellation

9.1 Cancelling an order

An order can be cancelled from My Orders until it is dispatched. Select the order, choose Cancel and pick a reason. Once the order is cancelled, the refund is initiated to the original payment method. Orders paid with Cash on Delivery are cancelled without any refund because no payment has been made.

9.2 Cancelling after dispatch

After the order is dispatched it cannot be cancelled. You can either refuse the delivery when the courier arrives, in which case the parcel is returned to us and a refund is processed after it is received, or accept the delivery and request a return if the product is eligible for return.

9.3 Editing an order

Orders cannot be edited after payment. This applies to the product, colour, quantity, coupon and payment method. If you want to change anything, cancel the order before dispatch and place a new one. The price and offers of the new order may differ from the original.

9.4 Cancellation by VoltKart

VoltKart may cancel an order in rare cases such as stock mismatch, pricing errors, quantity-limit violations, failed address verification or suspected fraud. In all such cases the amount paid is refunded in full to the original payment method and the customer is informed by email and SMS.

9.5 Refund after cancellation

For prepaid orders cancelled before dispatch, the refund is initiated immediately and normally reaches UPI and wallet accounts within 3 to 5 business days and credit or debit cards within 5 to 7 business days. The time shown by your bank may be longer than the time taken by VoltKart.

9.6 Pre-order and special-order cancellation

Pre-orders can be cancelled free of charge until dispatch. Products that are made to order or customised cannot be cancelled once the order enters production; the product page tells you if this applies.

10. Returns Policy

10.1 Return window

Eligible products can be returned within 7 days of delivery. The 7 days are counted from the date shown as delivered in My Orders. A return request must be created within this period. Requests raised after the 7 days have passed are not accepted unless the product is covered by warranty for a defect.

10.2 Conditions for a return

To be accepted, the product should be:

- unused and in the original, undamaged packaging;
- complete with all accessories, manuals, free gifts and the invoice;
- free of scratches, dents, stains or other signs of use;

- with brand seals and serial-number stickers intact, where applicable.

Products that fail these conditions at inspection may be rejected and sent back to the customer.

10.3 Items that cannot be returned

The following cannot be returned unless they are defective, damaged or wrong:

- earphones, headphones and earbuds that have been used, for hygiene reasons;
- software licences, digital codes and downloadable products;
- gift cards and store credit;
- products marked Non-returnable on the product page;
- consumables such as batteries, ink and storage media once opened;
- customised or made-to-order products.

10.4 Opened laptops, smartphones and tablets

Laptops, smartphones and tablets that have been opened, activated or used can be returned only if they are defective or damaged on arrival. If you simply change your mind about an opened device, the return is not accepted. Do not log into your accounts on a device you may want to return, and always remove personal data and accounts before handing it over.

10.5 Reasons for return

When starting a return, pick the closest reason: Defective product, Damaged product, Wrong item received, Missing item or accessory, Not as described, or Changed my mind. The reason decides which checks apply. Items returned for Changed my mind must meet every condition in section 10.2.

10.6 How to start a return

- Open My Orders in your account and select the order.
- Choose the item and select Return Request.
- Pick a reason and upload clear photos or a video if the item is damaged or defective.
- Choose a pickup address and a time slot.
- Keep the product packed with all accessories and the invoice until the pickup agent arrives.

Do not send the product by your own courier unless told to do so, since the return will not be linked to your order.

10.7 Pickup of returned items

Pickup is arranged by our courier partner, usually within 1 to 3 business days of an approved request. The agent checks that the parcel matches the request and gives you a pickup confirmation. If your pin code is not covered for pickup, the support team will tell you how to send the item back, and the courier charge will be reimbursed. Please keep the pickup receipt until the refund is completed.

10.8 Quality check

When the returned parcel reaches the VoltKart warehouse, it is checked against the return reason and the conditions in section 10.2. The check normally takes up to 2 business days. If the product passes, the refund is initiated. If it fails, the return is rejected.

10.9 Rejected returns

Returns can be rejected when the product shows physical damage caused after delivery, has missing parts or serial numbers, has been used beyond what is needed to test it, or does not match the product that was sold. Rejected items are shipped back to the customer. You can contact support within 48 hours of the rejection message to request a review, and you should include photos taken before the return.

10.10 Return shipping charges

Pickup for defective, damaged, wrong or missing items is free. For Changed my mind returns, a reverse pickup fee may apply and is shown during the return request. Return charges, if any, are deducted from the refund.

10.11 Partial returns and bundles

When an order has several items you can return a single item. For bundles and combo offers, the complete bundle must normally be returned, and a refund is calculated on the amount paid for the whole bundle. Free gifts that came with a product must be returned together with it.

11. Refunds

11.1 Who decides refunds

Refunds are approved by the returns team after the quality check. The virtual assistant cannot approve, reject or issue any refund. The assistant can only explain the process and timelines in this document.

11.2 Refund to the original payment method

A refund is normally sent to the same payment method that was used for the order. A refund to a different account is not possible for security reasons. Cash on Delivery orders are refunded to a bank account or UPI ID that you provide in the return request, after verification.

11.3 Refund timelines

After an approved return is received and passes inspection, the refund is initiated within 2 business days. Time taken to reach the customer depends on the payment method:

- UPI and wallets: usually 3 to 5 business days;
- credit cards and debit cards: usually 5 to 7 business days;
- net banking: usually 5 to 7 business days;
- VoltKart store credit: instantly after approval, if you choose this option.

The times above start when the refund is initiated, not when the return is requested.

11.4 Refund for cancelled orders

For prepaid orders cancelled before dispatch, the refund is initiated immediately and follows the same timelines as in section 11.3. For orders refused at the door or returned to us because of failed delivery attempts, the refund is initiated after the parcel is received back at the warehouse.

11.5 Refund status

The status of a refund is shown on the order details page as Return approved, Refund initiated or Refund completed. Once the status shows Refund initiated, further delay is usually at the bank. Check your bank statement or UPI app, and contact your bank with the refund reference number shown on the order page if the amount has not arrived after the stated time.

11.6 Refund not received

If the refund has not arrived after the timeline in section 11.3, contact support with your order reference, the refund date and the payment method. The team shares an Acquirer Reference Number, which your bank can use to trace the transaction. Do not send card numbers.

11.7 Refund amount

The refund covers the price paid for the product, including taxes. Delivery charges are refunded only if the return is due to a defective, damaged, wrong or missing item or a VoltKart error. Express charges, installation charges and reverse pickup fees follow the rules in the respective sections. If a coupon was used, the refund is the amount actually paid for that item after the discount.

11.8 Refund to gift card payments

If part of the order was paid by gift card or store credit, that part is refunded as store credit and the rest to the original payment method. Gift cards themselves cannot be refunded to cash.

12. Exchanges, Wrong, Damaged or Missing Items

12.1 Exchange policy

Direct exchange of a product for a different model, colour or size is not offered for most products. To get a different product, return the original item and place a new order. Exchange for size or colour is available only for wearables and accessories marked Exchange eligible on the product page.

12.2 Replacement for defective items

If a product is defective or dead on arrival within the 7-day return window, you can choose a replacement instead of a refund, subject to stock. If the same model is out of stock, a refund is issued. After the 7-day window, defects are handled under warranty.

12.3 Wrong item received

If you receive a different product than what you ordered, raise a Return Request within 48 hours of delivery and choose Wrong item received. Upload clear photos of the product, the label on the box and the outer packaging. After verification, a replacement is sent or a refund is issued.

12.4 Damaged item received

If the product or its packaging is physically damaged on arrival, raise a Return Request within 48 hours of delivery and choose Damaged product. Upload photos of the damage and the outer box, and a video of the unboxing if you have one. Please keep all original packaging until the request is closed.

12.5 Missing items or accessories

If an item or accessory such as a charger, cable or free gift is missing from the box, raise a request within 48 hours of delivery with photos of the box contents and the packaging label. Missing accessories are sent to you where possible, otherwise the product can be returned for a refund.

12.6 Used or tampered product received

If a product appears to be used, opened or tampered with when delivered as new, do not use it. Raise a request immediately with photos and keep the packaging. These cases are treated with priority and the product can be replaced or fully refunded.

12.7 Verification and decision

Wrong, damaged and missing item claims are verified by the support team, usually within 2 business days of the request. The team may ask for additional photos. Decisions are communicated by email and in the order details.

13. Warranty and Repairs

13.1 Manufacturer warranty

Most products carry the manufacturer's warranty, typically 12 months from the delivery date. The warranty period is shown on the product page and on the invoice. Some products, such as accessories and cables, may have shorter warranties of 3 to 6 months, and premium items may carry longer ones.

13.2 What the warranty covers

Warranty covers manufacturing defects and faults that occur during normal use, for example a battery that fails prematurely, a display that stops working without physical damage or a device that stops charging. Repairs, part replacements or replacement units are provided by the brand or its authorised service centre according to the brand's warranty terms.

13.3 What the warranty does not cover

Standard manufacturer warranty does not cover:

- accidental damage such as drops, cracks or bent bodies;
- liquid damage;
- damage caused by unauthorised repair or opening of the device;
- damage from using non-original chargers or accessories;
- normal wear, scratches and cosmetic damage;
- loss or theft;

- software issues caused by third-party apps or unofficial software.

13.4 How to claim warranty

You can contact the brand's authorised service centre directly with the invoice, or open Help in your VoltKart account, choose Warranty Claim and upload the invoice with a short description of the fault. The support team guides you to the nearest authorised service centre and shares the brand's service contact details. Keep the invoice safe, because it is the proof of purchase.

13.5 Repair timelines

Repair times are decided by the service centre and usually range from 5 to 15 business days, depending on parts availability. VoltKart cannot speed up repairs but can raise a follow-up with the brand if a repair is delayed. If a product cannot be repaired, the brand may replace it according to its warranty policy.

13.6 Warranty for returns and replacements

When a product is replaced under the return policy, the warranty period of the replacement starts again from the delivery date of the replacement. If a replacement is arranged by the brand's service centre under warranty, the remaining warranty of the original product continues.

13.7 VoltKart Protect

VoltKart Protect is a paid protection plan that adds cover for accidental and liquid damage and, on some plans, an extended warranty. The plan can be purchased within 30 days of delivery of the product. The plan name, price, coverage, claim limit and exclusions are shown on the plan page before purchase. A claim can be raised from Help by choosing Protect Claim. VoltKart Protect plans are non-refundable after the 30-day period.

13.8 Warranty on products bought from partner sellers

Products sold by partner sellers carry the warranty stated on the product page. The warranty process is the same: contact the authorised service centre or raise a Warranty Claim from your account.

13.9 Battery health

Batteries are consumables and gradually lose capacity. A reduction in battery life over time is not a defect unless the battery health falls below the limit stated in the brand's warranty terms.

14. Product Category Guides

14.1 Smartphones and tablets

Before using a new phone or tablet, charge it using the original charger and follow the brand's setup screens. Sign in with your own account only when you are sure you will keep the device. Smartphones and tablets are returnable within 7 days only if defective or damaged. For a defect, raise a Return Request within the window and describe the problem. For faults after 7 days, use the warranty process in section 13. Common issues and first steps:

- The device does not turn on: charge for at least 30 minutes with the original charger and cable, then hold the power button for 15 seconds.
- Fast charging is slow: use the original charger and cable, since third-party ones may limit the speed.
- The screen shows lines or discolouration: note when it began, record a short video and raise a request, since this may be a hardware fault.
- Network or SIM problems: try another SIM and restart the device before raising a request.

14.2 Laptops

Laptops are returnable within 7 days only if defective or damaged on arrival. Opened and activated laptops that you simply no longer want cannot be returned. Check the box contents, run the first start-up checks and look for scratches or dents within 48 hours of delivery so that any issue can be raised as damaged or wrong item. Common issues and first steps:

- The laptop does not start: connect the original charger, wait 30 minutes and try again. Hold the power button for 15 seconds to reset.
- Battery drains quickly: check for background apps, lower the screen brightness and install the brand's updates.
- Overheating: use the laptop on a hard, flat surface and keep air vents clear.
- Pre-installed software and licences: operating-system licences are tied to the device and cannot be returned separately.

14.3 Audio: earphones, headphones and speakers

For hygiene reasons, earphones, earbuds and headphones that have been used cannot be returned unless they are defective, damaged or wrong. Speakers follow the standard 7-day return policy if unused. Common issues and first steps:

- One earbud not working: place both earbuds in the case, charge them fully, then reset them using the brand's pairing steps and pair again.
- Bluetooth does not connect: forget the device in your phone's Bluetooth settings, restart Bluetooth and pair again.
- Low volume or crackling sound: clean the speaker mesh gently with a dry soft brush and test with another device.

14.4 Wearables: smartwatches and fitness bands

Wearables need the brand's own app for first-time setup. Install the official app, create or log in to your account and follow the pairing instructions. Straps and sizes can be exchanged only if the product page says Exchange eligible. Water resistance ratings describe protection under test conditions and do not cover damage from hot water, soaps or high-pressure water, so liquid damage is not covered by the standard warranty. Common issues and first steps:

- The watch does not pair: update the brand app, restart both devices and pair again.
- Incorrect step counts or heart-rate readings: make sure the watch is worn snugly and set your profile details correctly. Readings are estimates and are not medical measurements.

- The watch does not charge: clean the charging contacts and use the original charging cable.

14.5 Smart-home devices

Smart-home devices such as cameras, plugs, bulbs and speakers need a stable 2.4 GHz Wi-Fi connection during setup. Use the brand's app and make sure the phone is on the same network. Many of these products can be returned within 7 days if unused, but a device that has been paired and reset by the customer may be inspected more closely. Free installation is available for selected products and can be booked after delivery. Common issues and first steps:

- The device cannot connect to Wi-Fi: check that the network is 2.4 GHz, the password is correct and the router is close by.
- The device is offline: restart the router, then restart the device.
- A camera shows a blurred picture: clean the lens and check the Wi-Fi signal strength.

14.6 Chargers, power banks and cables

Use chargers and cables that meet the device maker's recommendation. Damaged or non-certified chargers can harm both the accessory and the device. Chargers, cables and power banks carry warranties of 3 to 12 months as printed on the product page. Power banks should not be carried in checked baggage on flights, and the airline's rules apply. Common issues and first steps:

- Slow charging: test with another cable and wall adapter.
- Power bank not charging devices: charge the power bank fully and check the output port label.
- Physical swelling, burning smell or excessive heat: stop using the product immediately, keep it away from flammable items and contact support.

14.7 Cameras and accessories

Cameras, lenses and gimbals are delicate products. Keep the original box and packing material until the return window has passed. Do not touch the lens or sensor with fingers, and use a blower or lens cloth only. Lenses and cameras that show signs of use, fingerprint marks or a broken seal may not be accepted for change-of-mind returns.

14.8 Computer accessories

Keyboards, mice, webcams, hard drives, memory cards and pen drives are returnable within 7 days if unopened and complete. Storage products that have been opened or used cannot be returned except if defective, because data may have been written to them. Back up your data before sending storage products for repair or replacement.

15. Technical Support for the Website and App

15.1 The website is not loading

Try these steps in order:

- Refresh the page.
- Check your internet connection and try another network, such as mobile data instead of Wi-Fi.

- Use an up-to-date browser such as the latest version of Chrome, Edge, Firefox or Safari.
- Clear the browser cache and cookies.
- Disable browser extensions such as ad blockers and try again, or open the site in a private window.
- Restart the router or the device.

If none of these steps work, contact support with the browser name and version, the device you are using and a screenshot of any error shown. If many customers report the same problem, a notice will be shown on the Help page.

15.2 The mobile app keeps crashing

Update the app to the latest version from your app store. Restart your phone and make sure there is enough free storage. Clear the app cache from your phone settings. If the app still crashes, uninstall and reinstall it and log in again. Reinstalling does not delete your orders because they are stored in your account. If the problem continues, send the phone model, operating-system version and what you were doing when the crash occurred.

15.3 Error at checkout

Check that your delivery address, pin code and mobile number are valid, that the product is available for your pin code and that your payment method is active. Try another browser or another payment option. If an error message appears, note it exactly. When contacting support, describe the error message and the steps that led to it, and avoid sharing card numbers or OTPs.

15.4 Cart or wishlist items disappearing

Items in the cart can be removed if the product goes out of stock or the price or offer changes. Make sure you are logged in to the same account on every device. Cart items are saved to your account when you are logged in, but not when browsing as a guest.

15.5 Not receiving emails, SMS or notifications

Check the spam folder and the notification settings in your account and on your phone. Make sure the registered email and mobile number are correct. Transactional messages such as order confirmations and OTPs cannot be switched off but can be delayed by network issues. Do not request an OTP repeatedly, because this can temporarily block further requests.

15.6 OTP not received

Wait for two minutes before requesting a new OTP. Check that your phone has network coverage and that SMS is not blocked, and that Do Not Disturb filters are not hiding messages. Make sure you entered the mobile number registered on your account. If you are using a bank card, the OTP is sent by your bank to the number registered with the bank.

15.7 Images, videos or pages not displaying correctly

Reload the page and clear the cache. Disable any browser extension that may be blocking images. Update your browser. On the mobile app, update to the latest version.

15.8 Reporting a bug

To report a problem with the website or the app, use Help and select Report a Problem. Please include the device, the browser or app version, the steps you followed and a screenshot or screen recording.

16. VoltKart Renewed and Trade-in

16.1 What is VoltKart Renewed

VoltKart Renewed sells refurbished products that have been inspected, tested, repaired where needed and cleaned. Renewed items are labelled by grade such as Like New, Very Good and Good, based on their cosmetic condition. Every Renewed product comes with a minimum 6-month VoltKart warranty and a replacement window of 10 days from delivery.

16.2 Returns on Renewed products

Renewed products can be replaced or refunded within 10 days of delivery if they are defective or do not match the grade or description. Minor cosmetic marks that are described in the grade are not treated as defects. The 7-day return period in section 10 does not apply to Renewed products; the 10-day window applies instead.

16.3 Trade-in programme

The trade-in programme gives you a credit towards a new purchase when you hand over an old device. Enter the device model, condition and answers to a few questions to get an estimated value. The final value is confirmed when our agent inspects the device at pickup. If the actual condition differs from what you stated, the value may be revised, and you can decline the offer at no cost.

16.4 Preparing a device for trade-in

Back up your data, sign out of all accounts, turn off any device-locking feature and factory-reset the device. A device that is still locked to your account cannot be accepted. The trade-in value is added as store credit or deducted from the price of the new order, as shown at checkout.

16.5 Trade-in and cancellation

If you cancel the new order after the trade-in pickup, the trade-in value is refunded as store credit. If the device has not yet been picked up, the trade-in request is cancelled with the order.

17. Business and Bulk Orders

17.1 Business accounts

Businesses and institutions can register a business account with a GSTIN to receive GST invoices and to access business pricing. Business customers can order in bulk, request quotations and manage several delivery addresses.

17.2 Bulk orders

Orders above the standard per-customer quantity limit need prior approval. Raise a request through Help with the product details and the required quantity. Bulk orders may take longer to deliver and may be shipped in multiple consignments. Payment methods such as COD may not be available for bulk orders.

17.3 Return and warranty for business customers

Business orders follow the same return and warranty terms as other orders, unless a different agreement was confirmed in writing at the time of the order.

18. Complaints, Escalations and Fraud Reporting

18.1 Raising a complaint

You can raise a complaint at any time from Help. Choose the relevant order, describe the problem and attach any photos or documents. A ticket number is generated and shown in your account so you can follow the status. You do not need to create several tickets for the same matter, because duplicates may slow down the response.

18.2 Escalation

If you are not satisfied with the first response, you can escalate the ticket from the ticket page after 3 business days. Escalated tickets are reviewed by a senior support specialist within 3 business days. The final decision is communicated in writing in the ticket.

18.3 Grievance officer

Customers who still feel their complaint has not been resolved can write to the VoltKart Grievance Officer through the link at the bottom of the Help page. The Grievance Officer acknowledges the complaint within 48 hours and resolves it within 30 days.

18.4 Reporting fraud or misuse

If you suspect fraud, for example a fake website, a suspicious message or an unknown transaction, report it immediately through Help and choose Report Fraud. Include screenshots, the date and any phone numbers or links involved, but do not share your passwords, OTPs or card numbers. You should also inform your bank and, where needed, file a complaint with the national cyber-crime reporting portal.

18.5 Abusive behaviour

VoltKart support staff are committed to helping every customer. Abusive, threatening or harassing language towards staff may lead to the conversation being closed and to restrictions on the account.

19. Quick Reference Tables

19.1 Policy summary

- Standard return window: 7 days from delivery for eligible, unused products.

- Renewed products: 10-day replacement or refund window.
- Opened laptops, smartphones and tablets: returnable only if defective or damaged.
- Wrong, damaged or missing items: report within 48 hours of delivery.
- Cancellation: free until the order is dispatched; not possible after dispatch.
- Address change: possible only before dispatch.
- Standard delivery: usually 3 to 6 business days after dispatch; India only.
- Delivery attempts: up to 3 before the parcel is returned.
- Tracking not updating: contact support after 48 hours.
- Refund timeline after a return passes inspection: UPI and wallets usually 3 to 5 business days; cards and net banking usually 5 to 7 business days.
- Failed payment with deduction: automatic reversal usually within 5 to 7 business days.
- Account lock: 30 minutes after 5 wrong password attempts.
- Password reset link validity: 30 minutes.
- Gift cards: valid for 12 months, not refundable, not redeemable for cash.
- Standard manufacturer warranty: typically 12 months from delivery.
- VoltKart Protect: purchasable within 30 days of delivery.
- Support hours: 9 AM to 9 PM IST, every day.
- COD limit: orders up to Rs. 50,000 in eligible pin codes.

19.2 What VoltKart will never ask for

VoltKart will never ask for your password, OTP, verification code, UPI PIN, full card number, card security code, net-banking credentials or gift card codes for any reason. It will also not ask you to install remote-access apps, to transfer money to receive a refund or to share your screen.

19.3 Which section to read for common questions

- Where is my order: sections 7 and 8.
- I want to cancel: section 9.
- I want to return something: sections 10 and 11.
- I received the wrong or a damaged item: section 12.
- My product has stopped working: section 13.
- I cannot log in: section 2.
- I was charged twice or my payment failed: section 5.
- The website or app does not work: section 15.

20. Glossary

20.1 Common terms

- Order reference: the unique number that identifies an order, shown in My Orders and in the confirmation email.
- Dispatch: the point when the courier collects the parcel from the warehouse or seller.
- Business day: a working day, excluding Sundays and public holidays.
- OTP: a one-time password valid for a short period and for one use only.
- COD: Cash on Delivery, where the customer pays when the order arrives.
- EMI: Equated Monthly Instalment, a plan to pay for a purchase in monthly parts.
- Quality check: the inspection of returned products at the VoltKart warehouse.
- Authorised service centre: a repair centre approved by the product brand.
- GSTIN: the Goods and Services Tax identification number of a business.
- Acquirer Reference Number: a reference that banks use to trace a refund or payment.
- Store credit: balance stored in your VoltKart account for future orders.
- Non-returnable: a product that cannot be returned, except for defects, damage or a wrong item.

20.2 Final note

This knowledge base reflects the policies of the fictional retailer VoltKart and has been written for academic, demonstration use in a retrieval-augmented generation experiment. Any resemblance to the policies of real companies is coincidental.
